

1 25. The digital amplifier of claim 14, wherein the noise
2 shaping network comprises a plurality of integrator stages.

1 26. An H-bridge controller which generates a multi-state
2 output, with at least three states.

al 1 27. The H-bridge controller of claim 20, wherein the H-bridge
2 controller has two output terminals, and the output signal on each
3 terminal is independently controlled. -

REMARKS

The Examiner has required a restriction under 35 U.S.C. § 121 to either Group I which includes claims 4-5 drawn to a H-bridge controller and claim 6 drawn to a digital amplifier, or Group II which includes claims 1-3 drawn to a modulator. Applicants have elected Group I to be examined.

The amendments to the claims and new claims find full support in the specification and add no new matter. Applicants request that the amended and new claims be entered prior to examination.

Accordingly, reconsideration and examination of the above-referenced application is requested.

Respectfully submitted,

CHRISTIE, PARKER & HALE, LLP
